

Radiation and Metal Detector Wand

Model Series: RAD-MET-TA

Features

- Dual Function Detector
- Detects – Gamma
- Detects – Metal
- Small, Lightweight
- Cesium Iodide (CsI) Crystal Scintillator Radiation Detector in Paddle
- Self-Calibrating to Different Backgrounds
- Alarms – Visual and Audio
- Battery 500 Hours

By reducing the overall number of instruments that agents, law enforcement, and public officials need to wear and utilize assures quicker scans and more robust and timely information. The ability to have continuous radioactive awareness without the need of additional equipment to augment the metal detectors already in use is more efficient and cost effective than simply adding an additional instrument. This dual-purpose instrument is the solution.

Application

Security Checks for Radioactive Contamination and Metal:

- Airports and Seaports
- Custom and Border Protection
- Events and Building Security
- Critical Infrastructure Protection

Description

Merging existing technology for metal scanning with radiation detector into an easy-to-use lightweight handheld wand provides security officers with a robust multi-use instrument. With 2 different LED indicators and 2 different alarm tones to notify the operator which type of threat is alarming.
